

## The Illustration Process

### 1. Sketch out your idea.

- Thumbnails*
- Assemble your references*
- Tonal compositions*
- Color compositions*
- Keep going until you have something you like and want to expand on*

### 2. Expand upon and Finalize your Bones

- Do the foundation drawing*
- Seek Critique and redlines from artist and non-artist friends*
- Tweak until foundation is solid*

### 3. Expand on possible Tonal and Color Compositions with the Completed Drawing

### 4. Add Details

- Figure out what parts of the picture really require detail, do not add too much anywhere that's not important.*

### 5. Seek critique as you go and when you need it, tweak accordingly.

### 6. Save or scan, and release! Time to move on to your next hit :P
